# Tektronix® 5 Series MSO

4

6

8

Channel  
Models

Ready for today's toughest challenges

1

15.6" HD display, capacitive touchscreen

2

350MHz to 2GHz bandwidth

3

Up to 64 digital channels

4

12-bit analog to digital converters

5

62.5 Mpoints standard record length

New  
Product

## 5 Series MSO Low Profile Oscilloscope

Raises the bar for Machine Diagnostics, and High Energy Physics Test

The 5 Series MSO Low Profile has 8 FlexChannel inputs plus an auxiliary trigger input in a space-saving 2U high package designed to fit into 19-inch wide racks. The instrument has side air vents so that instruments can be mounted in a rack directly on top of one another, saving even more space.

# Tektronix®

TTR500 2-port, 2-path Vector Network Analyzer

- Frequency Range: 100 kHz to 6 GHz
- Dynamic Range: Greater than 122 dB
- Output Power: -50 to +7 dBm

# Tektronix®

RSA500 Real-time Spectrum Analyzer

- Frequency range: 9 kHz to 7.5 GHz
- Capture bandwidth: 40 MHz
- Dynamic range: -160 dBm to +20 dBm

# GW INSTEK

The GPD series has up to 4 independent DC isolated channels. The high output resolution control guarantees a clean and stable output.

# GW INSTEK

The PEL-3000 series of electronic load ranges from 175-1050W, with 0.01 mA current resolution and 16A  $\mu$ s current slew rate.

# KEITHLEY

A Tektronix Company

The 4200A-SCS is the highest performance parameter analyzer. It provides synchronized insight into current-voltage, capacitance-voltage, and ultra-fast pulsed I-V characterization.

# KEITHLEY

A Tektronix Company

The 2281S-20-6 Dynamic Battery Simulator uses a model to emulate the response of a battery over its charge and discharge cycles.

# DVTEST

The dbSAFEx is an advanced single wall RF enclosure that offers the best RF shielding in its class. With up to 80dB of isolation.

# FLUKE

TiX500 Infrared Camera offers easy navigation around hard to reach objects, a 320x240 IR camera with touchscreen LCD and 240° rotating lens.

# VIAVI

The Aeroflex 3920B digital radio test set includes 2.7 GHz RF frequency range, full spectrum analyzer and tracking generator, as well as a host of optional test capabilities like the Auto-Test II Alignment.

# VIAVI

The Aeroflex 8800SX features advanced automated test and alignment, fast VSWR/Return Loss and Cable Fault measurements and new software capabilities to speed up testing of Land Mobile Radio systems.

# Anritsu

The LMR Master S412E is a compact handheld multi-function analyzer that includes: 2 Port cable and antenna and distance domain analysis, spectrum analyzer, signal generator and power meter.

# LOCUS USA

The DX-2002 series DiagnostX Over-The-Air (OTA) Waveform Analyzer identifies, analyzes and verifies the alignment and field performance of any portable or mobile radio in a network without user interaction.

## OUR KNOWLEDGEABLE SUPPORT STAFF ARE ALWAYS JUST A PHONE CALL AWAY.

**The number one technical rep firm for test equipment in the TOLA region.**
